## Better hybrid meetings

In today's hybrid workplace, with part of the people working in-office and others remote, video conferencing is the natural way of collaboration. And we prefer to start those videocalls from our own laptop. Still, connecting people in-room and remote can be a real challenge.

No wonder, workers expect employers to invest in better facilities and technology, to enable this hybrid work model.

**1/3**

wants better video conferencing technologies as most desired investment\*

**56%**

prefer to host video calls from their laptop\*

### Frictions experienced in a hybrid meeting

#### Cable hassle

You don't know which cables to connect to quickly share content on the room display and/or to use the room camera and speakers

#### Audio limitations

Remote participants can't hear everyone in the meeting room when you use the laptop's microphone

#### Video limitations

Remote participants can't see everyone in the meeting room when you use the laptop's camera

#### Struggle with app settings

You often need to adjust the video & audio settings of your VC app to activate the room camera and speakers

### The answer is ClickShare

Simple, easy, wireless. That's how ClickShare Conference shares the apps from your laptop on the meeting room display and wirelessly connects them to the camera, speaker and mic in the room for better hybrid meetings.
